

# STRUCTURES MORPHOLOGIQUES DES DIATOMÉES

## Les diatomées

Diatomée centrique : symétrie radiale

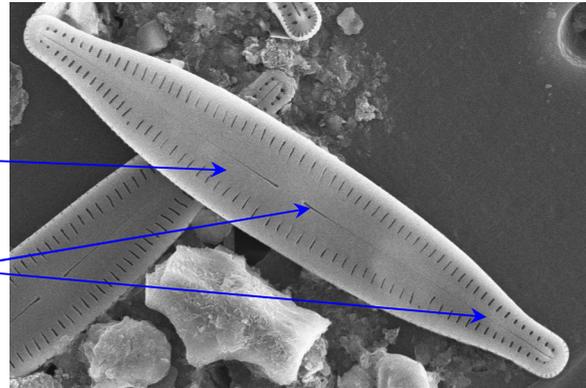

Vue valvaire

Aire hyaline

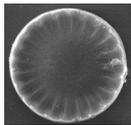

Raphé

Diatomée pennée : symétrie bilatérale

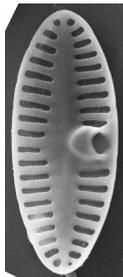

Vue valvaire

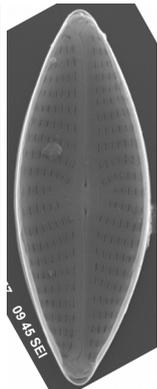

### Formes des valves

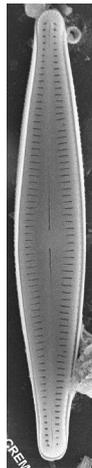

circulaire

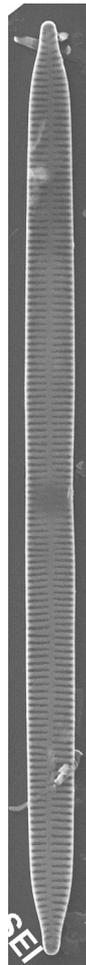

elliptique

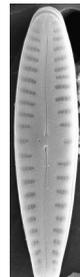

lancéolée

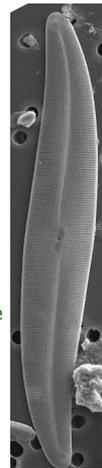

fusiforme

linéaire

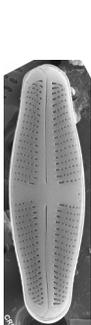

claviforme

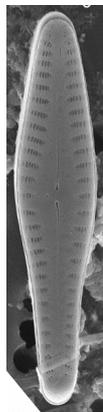

sigmoïde

### Symétrie des valves de diatomées pennées

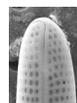

Valve hétéropolaire

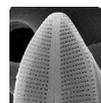

Valve isoinsulaire

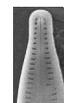

### Formes des apex

arrondi

cunéiforme

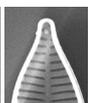

rostré

spatulé

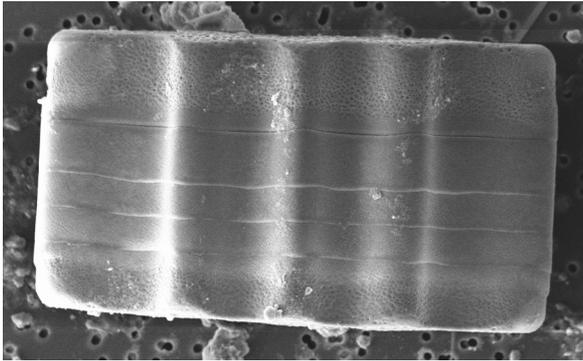

capité

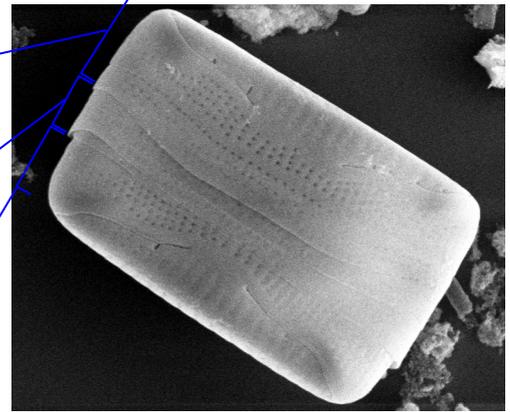

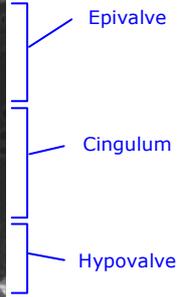

apiculé

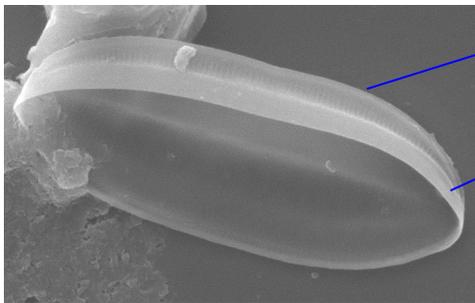

## Le frustule
